

120km optical module dual-mode self-operated

Overview

The SFP transceivers are high performance, cost effective modules supporting dual data-rate of 2. 488Gbps and 120km transmission distance with SMF. We offer both the DWDM-100G-Q28-120 and the DWDM2-100G-Q28-80, and we also frequently get a lot of questions regarding these modules, their differences, and their specifications. In this article, you will find all of the right answers to your. Cisco Compatible SFP+ transceiver supports up to 120km over OS2 SMF via an LC duplex connector. Fast Shipping! Global Shipping. Every SFP-GE-DW-120KM module is environmentally tested in its specific port/platform, which includes compliance verification for distance, wavelength, traffic density and light. The transceiver consists of three sections: a DFB laser transmitter, an APD photodiode integrated with a trans-impedance preamplifier (TIA) and MCU. This module can be used to compensate channel impairments caused by either single mode fiber up to 120 km. All modules satisfy class I laser safety requirements.
