

4 Multimode Optical Cable

Overview

OM4 Multimode Cables are high-performance optical fiber cables with a 50µm core, supporting up to 400 meters at 10 Gbps and 150 meters at 100 Gbps, OM4 cables operate at 850 nm wavelengths, offering superior bandwidth and reduced modal dispersion compared to OM3. Multi-mode optical fiber is a type of optical fiber mostly used for communication over short distances, such as within a building or on a campus. Multi-mode fiber has a fairly large core diameter that enables multiple light modes to be. Get OM4 multimode fiber optic cables 50/125 with bend insensitive fiber design that support 40G/100G cabling. 100% end-face, 3D interferometer, IL&RL tested. From the trusted RS PRO brand, this four-way fibre optic cable has a robust LSZH outer jacket suitable for more rugged applications. The robust outer insulation ensures the cable is. We offer worldwide delivery for our OM4 Fiber Cable solutions, ensuring your projects are supported by ultra-high-speed and reliable connectivity. OM5, also called wideband multimode fiber, allows multiple wavelengths to travel in the same core using SWDM.
