

# 450Mbps Fiber Optic Router

## Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. Up to 450 Mbps Wi-Fi speed, ideal for interruption-sensitive applications such as HD video streaming\*Three external antennas ensure optimal Wi-Fi coverage and rangeSimple WLAN security encryption by pressing the WPS button. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Upgrading to a router built for fiber optic means matching multi-gig WAN ports with a backplane that can actually forward packets at wire speed, not the sub-1 Gbps ceiling older hardware imposes. I'm Fazlay Rabby — the founder and writer behind Thewearify. Powered by the latest WiFi 7 (802. 11be) technology and a quad-core 2. TP-Link AX1800 Router Check Price On Walmart TP-Link's AX1800 Archer AX21 combines.
