

Bolivia CIF Price Optical Cable G 652D

Article Overview

The CIF price of G.652D optical fiber cable to Bolivia typically ranges from \$0.05 to \$0.20 per meter, depending on volume, supplier, and shipping conditions.

Overview of G.652D Fiber

G.652D is a low-water-peak single-mode fiber that operates across 1260–1625 nm, supporting CWDM and DWDM systems for high-bandwidth applications . It features low attenuation, excellent macrobending resistance, and optimized dispersion characteristics, making it ideal for FTTH, metro, and access networks . Standard spools are available in 25.2 km and 50.4 km lengths, with factory test reports and proof-testing ≥ 100 kpsi .

Factors Affecting CIF Price to Bolivia

- **Global Demand and Supply:** Prices have risen in 2025–2026 due to FTTH expansion, 5G rollout, AI data centers, and limited preform/drawing capacity .
- **Raw Material Costs:** Silica preform and copper components influence the base cost .
- **Volume Discounts:** Bulk orders over 100,000 meters can reduce per-meter costs by over 50% .
- **Supplier Type:** Direct manufacturers often offer lower prices than distributors, while Tier-1 suppliers may charge a premium for verified quality .
- **Logistics and Tariffs:** CIF pricing includes shipping, insurance, and freight. Import tariffs, customs clearance, and transport to Bolivia can add 10–20% or more to the base cable price .
