

Commonly Used Galvanized Cable Trays

Article Overview

Popular galvanized cable trays include Kable Kontrol, NavePoint, and heavy-duty pre-galvanized or hot-dipped steel trays, known for durability, corrosion resistance, and versatile applications.

Popular Galvanized Cable Tray Options

Kable Kontrol 5-foot Cable Tray

- Designed for network, AV, fiber optic, and computer cabling in offices, data centers, and garages.
- Dimensions: 4-inch width, 2-inch depth; comes in 10-piece bulk packs.
- Features chrome-finished galvanized steel with electro-zinc plating for corrosion resistance.
- Modular 5-foot sections can be joined for longer runs, supporting flexible layouts and quick installation . NavePoint Mesh Cable Tray

- Dimensions: 1.97-inch width, 59.06-inch length; sold in two-packs.

- Electro-zinc plated finish ensures long-term durability.

- Ideal for indoor installations requiring lightweight, corrosion-resistant support for multiple cables . Heavy-Duty Pre-Galvanized and Hot-Dipped Steel Trays

- Manufactured in 9.84-foot or 19.68-foot lengths, suitable for high-density commercial or industrial environments.

- Hot-dipped galvanized trays have thick zinc coatings (65-85 microns) for long-term protection against rain and salt air, lasting over 20 years.
