

Fiber Optic Cable Guide Wheel

Overview

The Cable Guide / Fiber Roller (Wheeled) Diameter: 5 mm is a practical and effective tool used in fiber optic cable installations. This specially designed cable guide ensures proper routing and secure mounting of fiber cables. With a Minimum Bend Diameter of 12", the Hi-Roller accommodates most aerial communications cables used today. Lightweight and capable of handling loads not to exceed 1000 lbs., (Fiber Optic Cable recommended load rating is 600LBF). CommScope's FiberGuide ® system has been the go-to fiber raceway choice for central offices, data centers and mobile switching centers for over 30 years. Condux Fiber Optic Cable Pullers consist of a hydraulic motor, variable speed foot control, manual flow control valve for adjusting maximum speed and a manually adjustable pressure relief valve for adjusting the ultimate pull tension.
