

GPONOLT Core Switch

Overview

Description: High density Core Switching GPON OLT, ALFOCOM AF7000, 48 GPON ports. VSOL provides carrier-grade XPON, GPON, EPON and 10G OLTs for scalable FTTX deployments. Available in box/chassis models with flexible port densities for ISP and enterprise networks. It uses modularized design concept, combined with advanced industrial design and manufacture technology to provide users with broadband access with. The AP224 series GPON CPEs are optical customer premises equipment for providing data, voice, and video services in optical distribution systems (GPON networks). When you stream a 4K video, join a remote meeting, or play an online game on a gigabit fiber connection, an OLT. The C-COR GPON OLTs are high performance 1RU GPON OLT solutions offering economical PON networking via 8 SFP ports. The OLTs feature. GPON (Gigabit Passive Optical Networks) is an Optical System for the Access Networks, based on ITU-T specifications G. It can provide a 20 km reach with a 28dB optical budget (shown in the following illustration) by using class B+ optics with 1:32 split ratio.
