

How much does a mesh cable tray cost in West Africa

Article Overview

Wire mesh cable trays in West Africa typically range from \$20 to \$80 per meter depending on size, material, and finish, with accessories sold separately.

Product Types and Specifications

Wire mesh cable trays are widely used for industrial and commercial cabling due to their durability, ventilation, and ease of installation. Common specifications include:

- **Material:** Hard-drawn high tensile steel wire, often hot-dip galvanized (HDG) for corrosion resistance, or stainless steel for harsh environments .
- **Wire Thickness:** Typically 4mm for medium-duty trays .
- **Mesh Aperture:** Standard sizes include 100 x 50mm or 50 x 50mm .
- **Finish Options:** Hot-dip galvanization is standard; stainless steel or powder-coated finishes may be available on request .
- **Accessories:** Joiner clamp sets, hold-down saddles, bends, tees, and reducers are sold separately and are essential for installation .

Indicative Pricing

While exact West African prices vary by supplier, import costs, and local taxes, regional pricing from South African suppliers provides a useful benchmark:

- **Medium-duty welded wire mesh tray (HDG, 4mm wire, 50 x 50mm):** Approximately \$25-\$40 per meter excluding VAT .
