

How to accept orders for home electrical distribution boxes

Article Overview

To accept orders for home electrical distribution boxes, you need to define product specifications, offer customization options, provide a clear quoting process, and ensure compliance with safety standards.

Define Product Options and Specifications

Before accepting orders, clearly outline the types of distribution boxes you offer, including:

- Number of circuits (ways): e.g., 4, 6, 12, 24 ways
 - Voltage and phase: e.g., 230V single-phase, 400V three-phase
 - Material and protection: ABS plastic, stainless steel, IP ratings for dust/water resistance
 - Optional features: MCBs, RCDs, RCBOs, surge protection, isolators, or bypass equipment
- Providing detailed specifications helps customers select the right product and reduces errors in order fulfillment.

Offer Customization and Quoting

Many suppliers allow customers to request custom distribution boxes based on their specific needs. To accept orders effectively:

- Collect detailed requirements: number of circuits, voltage, phase, protective devices, and environmental conditions (indoor/outdoor, moisture, corrosion) .
