

Huijue Optoelectronics Computing Optical Module

Overview

Huawei offers a comprehensive portfolio of pluggable StarryLink optical modules for data center networks, with various models providing flexible plug-and-play solutions tailored to diverse interface requirements. An optical module is a typically hot-pluggable optical transceiver used in high-bandwidth data communications applications. Optical modules typically have an electrical interface on the side that connects to the inside of the system and an optical interface on the side that connects to the outside. Composition of Optical Modules The optical module, known as Optical Transceiver in English, is a general term for various module categories, including optical receiver modules, optical transmitter modules, optical. Through power electronics conversion. Huawei's data center network leverages advanced optoelectronics technologies to establish high-performance connections, ensuring reliable interconnectivity across data center infrastructures.
