

MLS Distribution Box Basic Type

Article Overview

An MLS distribution box is a protective enclosure that safely distributes electrical power from a main supply to multiple circuits, typically housing circuit breakers, fuses, and essential safety components.

Overview

A distribution box (also called a DB box or breaker box) serves as the central hub for electrical power in a building, dividing incoming electricity into multiple circuits while protecting against overloads and short circuits . It ensures that each circuit receives the appropriate power and provides a safe disconnection point for maintenance .

Basic Types

- Single-Phase Distribution Box
 - Designed for residential or small commercial loads.
 - Typically handles lower voltage and fewer circuits.
- Houses miniature circuit breakers (MCBs) and sometimes residual current circuit breakers (RCCBs) for safety .
- Three-Phase Distribution Box
 - Used in industrial or large commercial facilities requiring higher power capacity.
 - Supports three-phase power systems and larger loads.
- Often includes MCBs, RCCBs, and bus bars for efficient power distribution .
