

Network Rack Fiber Optic Switch

Overview

Engineered for high-density environments, these switches offer wide bandwidth, advanced security features, and easy scalability, making them ideal for data center solutions, enterprises, and industries such as, transportation, manufacturing, utilities, and automation. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously. Various port sizes are available ranging from 4 up to 52 ports. The category includes Optical Circuit Switches (OCS) for large-scale connectivity, Wavelength Selective Switches (WSS) for DWDM and ROADM applications. 10G SFP+: The network switch has 8x10Gbps SFP+ slot, every port support 10G/1G SFP module. Support Open standard SFP interface optical module, no encryption, such as multi mode, single mode, SFP to RJ45 Modules. ***No include SFP module***** Web/CLI L3 Managed: Support device/port config and query. Choose from racks, panels, modules, splice trays, ethernet fiber switches and other structured cabling components. Corning has a variety of hardware solutions including ethernet fiber switches, panels, racks. A fiber optic switch represents the single most dynamic element in an optical network which traditionally can switch data between different ports of a network.
