

New Zealand Explosion-Proof Distribution Box Lighting

Article Overview

Explosion-proof lighting for hazardous areas in New Zealand is available from specialized suppliers like Infinity Lighting, PLP NZ, and ECOLight, offering LED luminaires and distribution solutions compliant with IECEx and ATEX standards.

Key Suppliers and Products

Infinity Lighting provides a wide range of explosion-proof and hazardous area lighting solutions suitable for industrial, chemical, and food processing environments. Their offerings include the ExSTREAM high-bay and floodlight series, capable of up to 31,000 lumens, and compact LED fittings like the e855 and e865, designed for areas with minimal illumination requirements. These products feature encapsulated LED modules, reflectors for mechanical and electrostatic protection, and thermal separation for high ambient temperature applications, ensuring durability and energy efficiency. PLP New Zealand specializes in hazardous area electrical equipment, including terminal boxes, control stations, cable glands, beacons, and lighting. They provide locally assembled solutions in Auckland, including purpose-built marine enclosures and distribution boxes, often in collaboration with global brands like R. Stahl, CMP, and Karl Dose. Their products are designed for gas and dust explosive atmospheres and comply with New Zealand and international standards. ECOLight offers the SPARTAN range of ATEX/IECEx LED floodlights, suitable for extreme environments such as oil and gas, offshore, chemical plants, and food processing facilities. These lights are modular, energy-efficient, and maintenance-friendly, available in both infrared and white-light options.
