

Offshore Price Transparent Optical Cable G 657A2

Article Overview

As of mid-2026, G.657A2 optical fiber is trading at approximately \$35 per kilometer, with prices subject to rapid fluctuations due to high demand and limited supply.

Current Pricing Overview

The offshore price for G.657A2 fiber has surged dramatically over the past year, reaching around \$35 per kilometer for bare fiber, up from \$18-22/km in late 2025, representing nearly a 90% increase in six months (Commesh, DTECH) . Spot prices can vary daily due to market volatility, with some sources reporting \$25-35/km depending on order timing and supplier allocation (GL Fiber, ByNet) . Pre-terminated cables, armored long-distance assemblies, and micro-cables may carry additional costs, often exceeding the raw fiber price by 20-50%.

Factors Driving Price Increases

- **Military and Drone Demand:** Fiber-guided drones, particularly in Eastern Europe and the Middle East, consume single-use G.657A2 fiber, creating competition with civilian telecom projects and driving prices higher .
- **AI Data Centers:** High-density GPU clusters in AI-focused data centers require bend-insensitive G.657A2 fiber for compact routing, significantly increasing demand (ByNet, GL Fiber) .
