

Price List for Vertical Cable Tray Installation

Article Overview

Vertical cable tray installation typically costs between \$50 to \$200 per meter, depending on material, height, complexity, and labor conditions.

Material Costs

The cost of the cable tray itself varies by material and type:

- Steel trays: \$5 to \$25 per meter, widely used for general-purpose installations .
- Aluminum trays: \$6 to \$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or humid environments .
- Fiberglass (FRP) trays: \$10 to \$50 per meter, suitable for aggressive chemical or high-moisture environments .
- Stainless steel trays: Higher-end option for maximum durability and corrosion resistance . Tray type (ladder, solid bottom, or wire mesh) and size also influence the price, with larger or heavier trays requiring stronger supports and more labor .

Installation Costs

Vertical installations are more complex than horizontal runs, which increases labor and coordination costs. Key factors affecting installation cost include:

- Installation height: Higher vertical runs require scaffolding, lifts, or additional safety measures, raising labor costs .
