

Price of Plastic Low Voltage Cable Trays

Article Overview

Plastic low voltage cable trays, typically made from PVC or HDPE, range from approximately \$10 to \$50 per meter depending on type, size, and supplier.

Pricing Overview

Plastic cable trays are available in various designs, including ladder, slotted, U-shaped, and fully enclosed trays, each suited for different applications and load capacities. PVC trays are widely used for indoor installations, offering excellent electrical insulation, corrosion resistance, and lightweight handling, while HDPE trays provide higher mechanical strength and chemical resistance for industrial or harsh environments .

- Standard PVC trays for residential or low-voltage systems typically cost \$10-\$20 per meter.
- Slotted or ventilated trays for data centers or office buildings range from \$15-\$35 per meter.
- Heavy-duty or fully enclosed trays for industrial or chemical plant applications can cost \$30-\$50 per meter .

Factors Affecting Price

- Material: PVC is generally more cost-effective, while HDPE offers higher durability and chemical resistance, slightly increasing the price.
- Tray Type: Ladder-style trays are often more expensive than simple U-shaped trays due to additional material and structural support.
- Dimensions: Wider or deeper trays designed to carry more cables cost more.
