

Price of electrical distribution boxes for construction sites in Cuba

Article Overview

Construction site electrical distribution boxes typically range from \$150 to \$1,200 USD depending on capacity, material, and features, with higher-end models offering advanced monitoring and weatherproofing.

Typical Price Ranges

- Small, single-phase boxes (for light-duty tools and temporary power) generally cost \$150–\$400 USD. These units usually include basic circuit breakers, 110V/220V outlets, and standard safety features .
- Medium-duty three-phase boxes (for heavier construction equipment) range from \$400–\$800 USD, often featuring multiple outlet types, RCD/GFCI protection, and IP65–IP67 weatherproof ratings .
- High-capacity or advanced distribution boards with load monitoring, digital displays, and smart control systems can cost \$800–\$1,200 USD or more, suitable for large construction sites or temporary events .

Key Features Affecting Price

- Material and Durability: Boxes made from technopolymer, fiberglass, or powder-coated steel are more resistant to impact, moisture, and UV exposure, increasing cost .
- IP Rating: Outdoor-rated boxes (IP65–IP67) are weatherproof and essential for Cuban construction sites exposed to rain and dust .
