

Price of fiberglass trapezoidal cable trays in West Africa

Article Overview

Fiberglass trapezoidal cable trays in West Africa typically range from \$25 to \$60 per meter, depending on size, load rating, and supplier.

Overview

Fiberglass (FRP) cable trays are valued for their corrosion resistance, lightweight structure, and electrical insulation properties, making them ideal for industrial and coastal environments common in West Africa. Trapezoidal designs provide high load-bearing capacity while maintaining a relatively low weight, suitable for heavy-duty cable management in factories, power plants, and infrastructure projects.

Price Factors

- **Material and Quality:** Fiberglass trays are more expensive than standard galvanized steel due to the cost of resin and reinforcement fibers. Higher-grade resins or UV-resistant coatings increase the price.
- **Dimensions and Load Rating:** Wider trays or those designed for heavier cable loads cost more. Standard widths range from 100 mm to 600 mm, with heights from 50 mm to 150 mm.
- **Accessories:** Bends, tees, reducers, and supports are sold separately and can add 10–30% to the total system cost.
- **Supplier and Shipping:** Importing trays from Europe, Asia, or South Africa to West Africa can increase costs due to freight, customs duties, and local taxes. Local distributors may offer slightly lower prices but with limited stock.
