

Rack-mounted lithium battery cabinet energy-saving type used for broadcast transmission

Overview

Bakes battery modules, BMS, power distribution and climate/fire protection into one cabinet for plug-and-play installation and easy transport. Low-profile, space-saving design (15–50 kWh) featuring highly flexible mounting (wall-, pole- or floor-mount) to suit varying site topography. Internal fire. EverExceed can provide customers with battery Rack, indoor cabinets and outdoor air conditioning cabinets for lithium batteries, which are widely used in telecommunications, solar, UPS application, radio and television, monitoring stations, electricity, energy, transportation, security, power. The Rack Mount Energy Storage Cabinet is a modular, space-efficient solution designed for telecom, solar, and industrial power backup systems. Their compatibility with standard 19-inch enclosures, extended cycle life, and robust safety profile make them a preferred choice in projects where space, reliability, and adaptability. GSL ENERGY provides advanced, scalable telecom lithium-ion batteries for stable backup power. Our safe, high-performance LiFePO₄ systems ensure uninterrupted operations for global communication stations and telecom towers.
