

Router fiber optic cable is lit up red

Overview

To fix a red LOS light on your router/ONT, start by checking that the fiber patch cord is firmly clicked into the ONT's PON port and undamaged, then power cycle the device for 30 seconds. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do. Ensure your Fiber Jack is connected to the network and the LED lights are connected and working properly before moving. That blinking red LOS light means your router has lost its connection to your internet provider's network. Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes. Sometimes it may be due to a problem with your internet service provider, although you could also be experiencing this issue due to improper configuration of your router, a poorly connected cable, etc. If the light stays red, check your ISP's app or helpline for an. Why does my fiber internet and TV keep dropping with the LOS LED flashing red, and could the cable under the skirting board be causing it?

The intermittent LOS red flash is more likely caused by the ONT/modem, its power supply, a bad connector/adaptor, or a problem on the provider side than by the.
