

Routers suitable for China Unicom fiber optic connections

Article Overview

Most modern fiber-optic routers with GPON or Ethernet WAN support, including models from NETGEAR, ASUS, and TP-Link, are compatible with China Unicom fiber connections.

Key Considerations for Compatibility

- **WAN Type:** China Unicom fiber typically uses GPON or Ethernet WAN. Ensure the router supports either a direct fiber WAN port or can connect via an ONT (Optical Network Terminal) using Ethernet.
- **Speed Support:** For gigabit or multi-gigabit fiber plans, choose routers with 1G or 2.5G WAN/LAN ports and Wi-Fi 6 or Wi-Fi 7 standards to fully utilize the bandwidth.
- **LAN Ports:** A minimum of 4 Ethernet LAN ports is recommended for wired devices, with some routers offering LAN aggregation for higher speeds.
- **Coverage and Features:** Consider routers with MU-MIMO, OFDMA, and beamforming for stable connections across multiple devices, especially in larger homes.

Recommended Routers

- **NETGEAR Nighthawk Tri-Band WiFi 7 Router (RS700S):** Supports multi-gig speeds, Wi-Fi 7, 10G WAN/LAN ports, and LAN aggregation, ideal for gaming, streaming, and large households .
- **ASUS RT-AX86U Pro:** Features a 2.5G Ethernet port, Wi-Fi 6, AiProtection security, and strong coverage for multi-device setups .
