

Steps to connect fiber optic cable to router

Article Overview

To connect a fiber optic cable to your router, you need an Optical Network Terminal (ONT) to convert the fiber signal into Ethernet, then link it to your router's WAN port.

Required Equipment

- Optical Network Terminal (ONT): Provided by your ISP, it converts optical signals into electrical signals your router can use .
- Fiber optic cable: Usually single-mode with SC/APC or SC/UPC connectors .
- Ethernet cable: Cat6 or higher for connecting the ONT to the router .
- Fiber-ready router: Ensure it supports gigabit speeds or higher .

Step-by-Step Connection

- Locate the fiber wall outlet: This is where your ISP's fiber line enters your home .
- Connect the fiber optic cable to the ONT: Remove protective caps, align the connector, and insert it until it clicks securely .
- Power on the ONT: Wait 2–5 minutes for the status lights to stabilize .
- Connect the ONT to the router: Use an Ethernet cable from the ONT's LAN or GE1 port to the router's WAN/Internet port .
- Power on the router: Wait for the indicator lights to confirm a successful connection
