

The electrical distribution box is located behind the building

Overview

Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. Each. A distribution board (also known as a panelboard, circuit breaker panel or box, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit breaker for each circuit in. A panelboard is a distribution assembly designed to divide an incoming electrical feed into numerous smaller branch circuits. Each circuit is protected by its own circuit breaker. You will typically find panelboards in residential, commercial, and light industrial settings, often flush-mounted on.
