

The router connected to the fiber optic cable shows no network connection

Overview

“To troubleshoot fiber network issues, start by inspecting physical connections, testing signal strength, and verifying device functionality. Use OTDR for advanced diagnostics and resolve configuration errors to restore performance.” External Links · Fiber Optic Standards. If your fibre internet is not working, the quickest fix depends on the lights on your fibre box (ONT), router, or the behaviour you are experiencing. Choose the section below that best matches your issue: A red or flashing LOS light usually means the fibre signal to your home has been interrupted. Switch A is on the router end, devices connected to this switch get DHCP leases and can browse the internet without issue. It helps to know what the different boxes. This morning my ISP upgraded my Internet connection from a standard coaxial cable and Cisco modem to a fiber optic cable and Hitron modem Model Name NOVA-2004. Despite multiple attempts, the Archer AX6000 v1. Sometimes, those two are combined in a single hardware box called a residential gateway.
