

Upgraded version of SN connector for cloud computing

Overview

Optimized for 400G hyperscale data centers and cloud computing, the SN® connector simplifies break-out configurations and maintenance with low insertion loss. High-Density Design: Increases fiber density by three times. Easy Maintenance: Push-pull mechanism for easy handling. The SN is ceramic-based fiber optic connector so compact and flexible that it can be utilized either as a Base-8 trunk solution, a Base-2 patching interface or as a Base-8 connection to next generation 200G, 400G, and 800G transceivers. SENKO's SN connector is a Very Small. We recommend updating to 2. What is new?
