

What are the different models of power distribution boxes

Article Overview

Power distribution boxes come in various models classified by installation, material, phase, and function, each suited for specific residential, commercial, or industrial applications.

Classification by Installation

- **Surface-Mounted Distribution Boxes:** Installed directly on walls, ideal for retrofits, industrial environments, or outdoor use where easy access is required .
- **Flush-Mounted Distribution Boxes:** Embedded into walls for a clean, aesthetic appearance, commonly used in residential and commercial buildings .
- **Pole-Mounted Distribution Boxes:** Designed for outdoor applications such as street lighting or utility distribution .
- **Open Installation:** Cables are visible, making maintenance easier but less visually appealing .
- **Concealed Installation:** Built inside walls, offering a neat look but more challenging access for servicing .

Classification by Material

- **Metal Distribution Boxes:** Made from steel or aluminum, offering high mechanical strength, impact resistance, and durability, suitable for industrial or harsh environments .
