

Which manufacturer makes the cold aisle server racks

Overview

In 2024, Worthington Armstrong Venture (WAVE), a joint venture between Armstrong World Industries, Inc., acquired all of the assets of Data Center Resources, LLC (DCR) related to the design and manufacture of customizable, modular aisle. Optimise your data centre, drive return on investment and contribute to a greener future with cold aisle enclosures that optimise your server rack cooling system. Cold aisle enclosures seal in cold air and prevent mixing of cold and hot server exhaust air. Bespoke end of aisle containment doors. Eaton offers a wide range of partial and total containment solutions that can accommodate hot aisle containment, cold aisle containment and rack-based heat containment. Eaton aisle containment ceilings, walls, and end of row doors, create an efficient and predictable aisle containment solution. This solution ensures that data centers can provide maximum cooling effectiveness, minimize energy consumption and operational costs, and maximize. Cold aisle containment creates an enclosed corridor in front of server cabinets, ensuring that the coldest air goes directly into equipment intakes.
